Subject: Reference for Mr. ^{Shashank} Deep

To whom it may concern,

We are pleased to provide this reference for Mr. ^{Shashank} Deep, who worked with us as a Full-Stack Research Intern at PhytoMaps.

During his internship, ^{Shashank} primarily focused on frontend development, contributing to the design and implementation of user-facing interfaces for geospatial data visualization. His work involved building interactive map views, improving usability, and ensuring that complex spatial data could be explored and compared in a clear and intuitive manner.

^{Shashank} showed strong initiative in understanding the product requirements and translating them into functional and visually consistent interfaces. He collaborated closely with backend and AI/ML team members, ensuring that frontend components aligned well with data pipelines and model outputs. His willingness to coordinate, ask clarifying questions, and adapt quickly made him a reliable and effective team member.

One of ^{Shashank}'s key strengths was his collaborative mindset. He worked constructively within the team, contributed ideas during discussions, and remained open to feedback throughout the development process. He demonstrated a steady focus on improving the user experience while maintaining technical correctness.

It was great working with ^{Shashank}, and we are thankful for the effort and dedication he brought to the project. He approached his responsibilities with seriousness and consistency, and we wish him continued success in his future academic or professional pursuits.

Sincerely,

Yogesh Kumar Reddy Ramireddy
